Comments: (If possible, please reference section and/or page number in document if applicable.)

The government was formed by the people and for the people. The people of Nevada do not want this waste here. And if you put it here anyway that must mean the government is for the people and by the people all except for the people of Nevada in the past government told the people of Nevada the atomic boom test was perfectly safe and we will never know how many people that was killed. Because of the long term affect the government told the people of Nevada area #51 was perfectly safe and how many people are now dead and dying I don't know the count anymore they keeps changing. The government told the people of Nevada low level waste they were storing here in the desert was perfectly safe and it was been found leaking into the water under ground here. The government record on perfectly safe has not been good with the State of Nevada, one accident at that sight whether it be by man or God nature or a terrorist boom will make Nevada into a radio active waste land. Keep the waste where it is at and out of Nevada.

Please note: For your comment(s) to be considered by the Secretary of Energy before a decision is made whether to recommend the site to the President, your comment(s) need to be received by the U.S. Department of Energy by September 20, 2001. To the extent practicable, the Department will consider comments received after September 20, 2001.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
